Top Skills

Software Developer
Graphic Designer
Computer technician

Profile

PHP Backend Developer with over 3 years of experience. I also have expertise in programming languages such as C++, C#, Python, Java, and JavaScript. I am experienced in data structures such as search trees, graphs, linked lists, and object matrices. I enjoy continuous learning and do not restrict myself to what I already know. Additionally, I have proficiency in design software such as Photoshop and Illustrator. In various projects, I have been responsible for generating assets and graphic identity to create systems that are not only functional but also aesthetically pleasing. It's worth mentioning that I use Git and GitHub technologies to manage the versions of my projects, ensuring a more organized and simple versioning process.

Work Experience:

- Web Backend Developer with PHP.
- Graphic Designer for web and applications.
- Web Frontend Developer with HTML, JS, and CSS.

Experience

2022 - PRES

COMPANY
